Bring science to life for your family

Are your kids curious about nature and science?

For younger learners, Project BudBurst offers BudBurst Buddies, a companion program that uses a story to introduce the process of observation and data collection. Kids follow the explorations of the story characters, Lily and Sage, to learn that like Lily and Sage, they too can undertake their own plant investigation. BudBurst Buddies select a plant to watch and record their observations in their plant journal. After submitting four observations on the BudBurst Buddies website, BudBurst Buddies earn their own personalized certificate signed by Project BudBurst scientists. Learn more at budburstbuddies.org.

Getting Started with BudBurst Buddies

Everything you need to participate in BudBurst Buddies can be found online. Online resources available on the BudBurst Buddies website include downloadable journal pages, parent resources, and online games.

Coloring Pages

Storybooks

Matching Game

Parent Resources
